Activity Report 4

On February 29, 2024, nine undergraduate students and one staff member from Hiroshima University visited a project under JICA's grassroots technical cooperation program.

1. Visit to Nkhata Bay District Office

Despite a busy schedule, the District Governor warmly welcomed the students.

2. Visit to the Target CBCC of the project

At first, the children were nervous about the students' visit, but after receiving candy from the students, they were delighted and began to talk. Community members and the village chief also gathered and warmly welcomed the students.

3. Visit to a Nearby Primary School

The students observed a class and participated in group discussions. The primary school students were excited and thrilled by the visit and eagerly spoke to the students in English.
